- What is guitar tab?
- How to read guitar tab
- How to find guitar tab
- How to use guitar tab to learn new songs

Guitar tab is a type of musical notation that uses numbers to represent the frets on a guitar. Each line of tablature corresponds to a string on the guitar, with the lowest string (the 6th string) at the bottom and the highest string (the 1st string) at the top. The numbers on the lines indicate which fret to play on that string.

For example, the following tab shows the opening riff to the song "Smoke on the Water" by Deep Purple:

```
e|----- B|----- G|-----  
----- D|----- A|-0-3-5-3-0----- E|-----  
-1-3-0-----
```

To play this riff, you would play the open 6th string (e), followed by the 3rd fret on the 5th string (A), the 5th fret on the 4th string (D), the 3rd fret on the 5th string (A), the open 5th string (A), and finally the 1st fret on the 4th string (D) and the 3rd fret on the 6th string (e).

Reading guitar tab is relatively simple, but there are a few things you need to know to get started.

First, you need to be familiar with the six strings of the guitar. The strings are numbered from 1 to 6, with the 1st string being the highest-pitched string and the 6th string being the lowest-pitched string.

Second, you need to know how to read numbers. The numbers on the tablature lines indicate which fret to play on that string. For example, the number "3" on the 5th string line means that you should play the 3rd fret on the 5th string.

Finally, you need to know how to interpret the symbols that are used in tablature. The most common symbols are:

- **0**: This symbol means that you should play the open string.
- **x**: This symbol means that you should not play that string.
- **h**: This symbol means that you should hammer-on to that fret.
- **p**: This symbol means that you should pull-off from that fret.
- **b**: This symbol means that you should bend the string up.
- **r**: This symbol means that you should bend the string down.

There are many different ways to find guitar tab. One of the easiest ways is to search for it online. There are a number of websites that offer free guitar tab, including:

- **Ultimate Guitar**
- **Songsterr**
- **911Tabs**

You can also find guitar tab in books and magazines. Many guitar magazines include tablature for popular songs, and there are also a number of books that contain tablature for a variety of songs and genres.

If you're having trouble finding tab for a specific song, you can always try to create your own. There are a number of software programs that can help you create guitar tab, or you can simply write it out by hand.

Guitar tab can be a great way to learn new songs. Here are a few tips for using tab to learn songs:

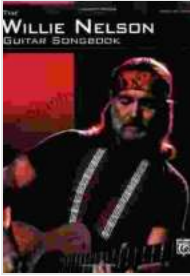

- **Start with easy songs.** If you're a beginner, it's best to start with songs that are relatively easy to play. This will help you build confidence and get a feel for how to read tablature.
- **Listen to the song.** Before you start playing, listen to the song to get a feel for the rhythm and melody. This will help you understand how the tab fits into the song.
- **Break the song down into smaller sections.** It's often helpful to break down a song into smaller sections, such as the intro, verse, chorus, and bridge. This will make it easier to learn the song one piece at a time.
- **Practice regularly.** The more you practice, the better you'll become at playing guitar. Try to practice for at least 30 minutes each day.
- **Don't be afraid to experiment.** Once you've mastered the basics, don't be afraid to experiment with different ways of playing the tab. You may find that you can come up with your own unique interpretations of the songs you learn.

Guitar tab sheet music can be a valuable tool for guitarists of all levels. It can help you learn new songs, improve your technique, and expand your musical repertoire. With a little practice, you'll be able to use guitar tab to play your favorite songs like a pro.
