## Menger's Background

Menger was born in France in 1951. He earned a degree in engineering from the École Polytechnique in Paris and a master's degree in business administration from the University of California, Berkeley. After working for

several years as a management consultant, Menger joined General Motors in 1984.

At GM, Menger led the development of a number of innovative manufacturing techniques, including the Toyota Production System (TPS). TPS is a lean manufacturing system that focuses on reducing waste and improving efficiency. Menger also developed a number of Six Sigma tools and techniques, which are used to improve quality control.

In 1999, Menger left GM to found his own consulting firm, Pierre Michel Menger & Associates. The firm provides a range of services to manufacturing companies, including lean manufacturing consulting, Six Sigma training, and quality control consulting.

### **Menger's Contributions to Manufacturing Operations Management**

Menger has made a number of significant contributions to the field of manufacturing operations management. His work on lean manufacturing has helped companies around the world improve their efficiency and profitability. His work on Six Sigma has helped companies improve their quality control and reduce defects.
