About the Workshop

The Second International Workshop on VLSI 2024 (VLSI 2024) will be held in Kyoto, Japan, from January 22-23, 2024. The workshop will bring together leading researchers and practitioners from academia and industry to discuss the latest advances in VLSI design and technology.

VLSI, or very-large-scale integration, is the process of integrating thousands or even millions of transistors into a single integrated circuit (IC). VLSI technology has revolutionized the electronics industry, making it possible to create complex and powerful electronic devices at a fraction of the cost of traditional discrete component designs.

The VLSI 2024 workshop will cover a wide range of topics, including:

- * VLSI design methodologies
- * VLSI circuit design
- * VLSI device fabrication
- * VLSI testing
- * VLSI applications

The workshop will also feature invited talks from leading experts in the field.

Call for Papers

The VLSI 2024 workshop organizers invite submissions of original research papers on all aspects of VLSI design and technology. Papers should be no more than 6 pages in length and should be formatted according to the IEEE conference template.

Papers should be submitted electronically via the workshop website by **October 15, 2023**.

Important Dates

October 15, 2023: Paper submission deadline * **November 15, 2023:** Notification of acceptance * **December 15, 2023:** Camera-ready paper submission deadline * **January 22-23, 2024:** Workshop dates

Registration

Early registration for the VLSI 2024 workshop will open on **November 1, 2023**. The registration fee includes access to all workshop sessions, materials, and coffee breaks.

Accommodation

A block of rooms has been reserved at the Kyoto Miyako Hotel for workshop participants. To book a room, please call the hotel directly and

mention the VLSI 2024 workshop.

Contact Information

For more information about the VLSI 2024 workshop, please contact the workshop organizers at:
